Country exposure:	South Africa, Zambia, Botswana, Zimbabwe, Burundi, Kazakhstan, Senegal, Sierra Leone, Kenya, Nigeria, Sweden, Morocco, DRC, Tanzania

Breton has 2 decades’ post-qualification experience in the project engineering industry. He has been involved in a variety of activities ranging from business operations, project management, asset valuations, due diligences, EPCM contracts and feasibility studies for various business initiatives.

Over the past 13 years, whilst in the consulting and engineering industry, Breton has systematically built significant experience in managing departments, divisions, business units and projects in a variety of industries. Each requiring competence in operations management, office administration, marketing, networking, business development, HR considerations, financial modelling, fund raising and budget, time and quality management. Even though Breton is an engineer by training, he has developed skills suitable for general management, business administration and project management. He can operate in almost any environment/industry (Examples include process plants, water treatment plants, business advisory to consulting engineering practices, agriculture, corporate social responsibility projects, Waste Management, Materials Recycling, various OEMs etc.) During this period, Breton has been involved in over 140 projects and consulting jobs in a variety of industries.

More recently, Breton has also been involved with asset valuations for various business rescue and liquidation practitioners, business plan development for start-up businesses as well as company valuations.
